2022-09-01 v2.0.1.330

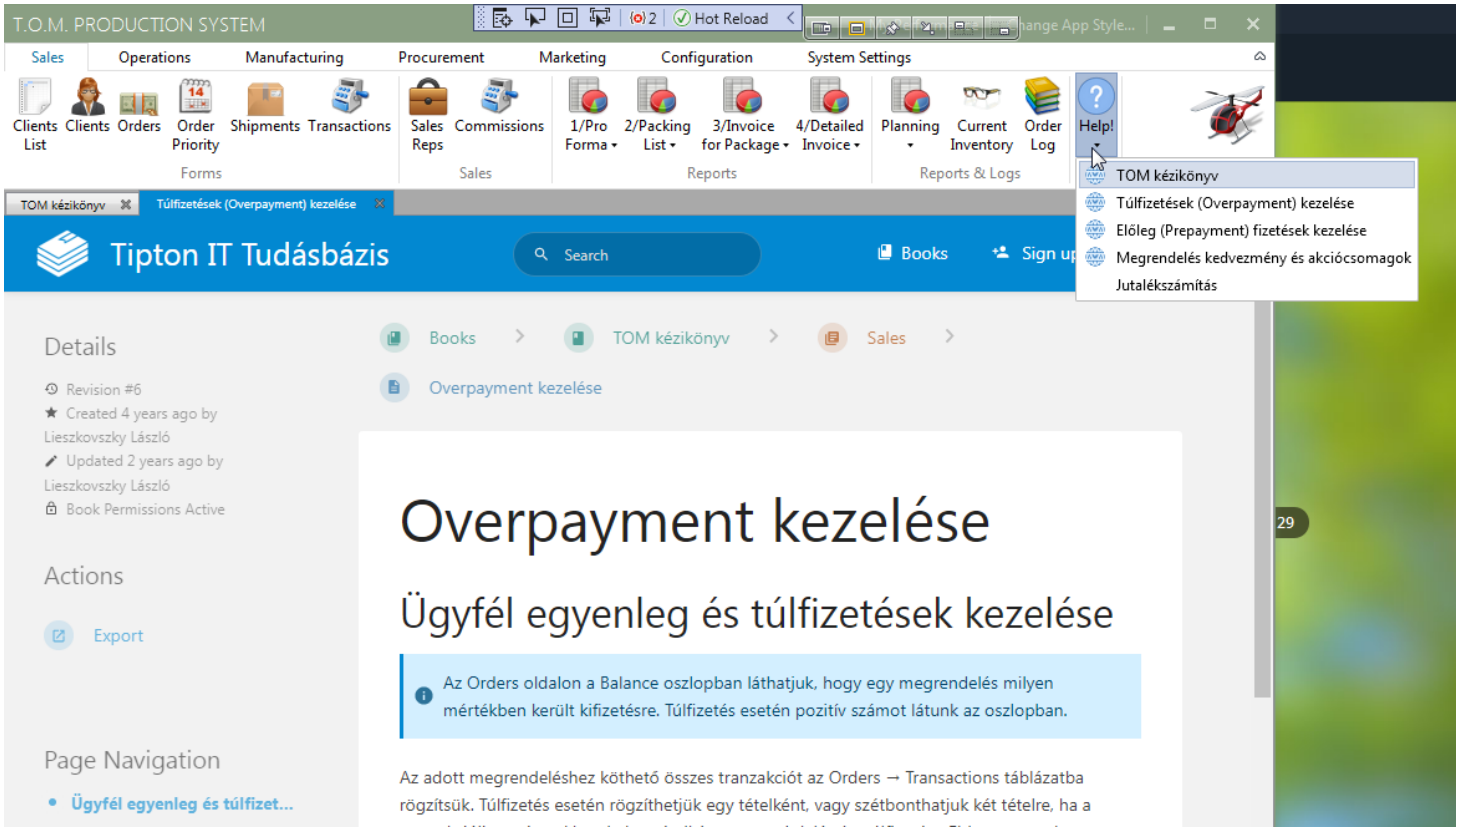

- [Viv] Product field is now editable on the Inventory Item form (both when opening from the Product Inventory page or the Assembly Sheets page). The field only shows products for the given model:

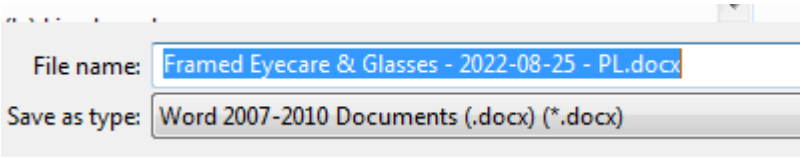

- [Csilla] Product Inventory now shows "QA Passed On" column both on the Product Inventory as well as Assembly Sheets views:

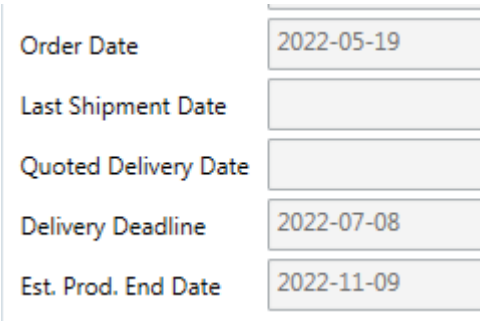

- [LLL] Help menu got a new icon and help pages now load within the application:

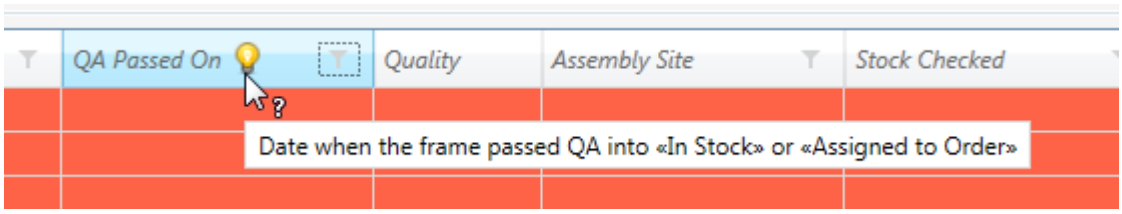

- [Viv] Bugfix: some reports were generated improperly, for example "PACKING_LIST_ORDER"; fixed:

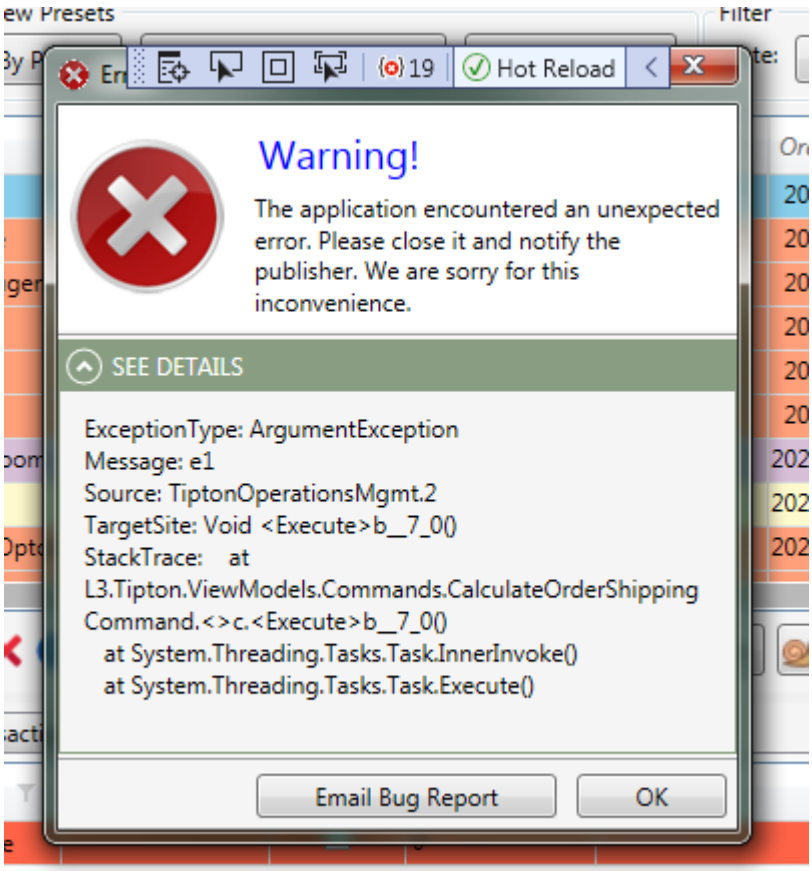

- [LLL] Fixed issue where read-only date fields disregarded an attached "FormatString" attribute and showed a time component always:

- [LLL] Added little question mark to column headers where a description is available:

- [LLL] Improved handling of aggregate exceptions:
