

2022-09-01 v2.0.1.330

- [Viv] Product field is now editable on the Inventory Item form (both when opening from the Product Inventory page or the Assembly Sheets page). The field only shows products for the given model:

The screenshot displays a form with the following fields and values:

- Fast tracked?:
- Status: Backordered
- Serial #: VxxNTMTX177,059
- Barcode: (empty)
- Collection: Vinylize
- Model: Nita
- Product: Nita/MTX1 (dropdown menu is open, showing options: Nita/MJB1, Nita/MTX1, Nita/VBIB1, Nita/VBLH1, Nita/VCWH1)
- Sun Lens? (empty)
- Assembled by (empty)
- Quality (empty)
- Assembly Site (empty)
- Stock Checked (empty)

On the right side of the form, there is a vertical list of labels: Orde, Clie, Orde, Orde, Orde, Orde, Shipr, Orde, Last, Quot, Deliv.

- [Csilla] Product Inventory now shows "QA Passed On" column both on the Product Inventory as well as Assembly Sheets views:

- [LLL] Help menu got a new icon and help pages now load within the application:

The screenshot shows the T.O.M. PRODUCTION SYSTEM interface. The top navigation bar includes Sales, Operations, Manufacturing, Procurement, Marketing, Configuration, and System Settings. A new Help icon (a question mark) is visible in the top right corner. A dropdown menu for the Help icon lists the following items: TOM kézikönyv, Túlfizetések (Overpayment) kezelése, Előleg (Prepayment) fizetések kezelése, Megrendelés kedvezmény és akciósomagok, and Jutalékszámítás.

The main content area displays the 'Overpayment kezelése' help page. The page title is 'Overpayment kezelése' and the subtitle is 'Ügyfél egyenleg és túlfizetések kezelése'. The page content includes a revision number, creation and update dates, and a list of actions (Export). The page navigation shows 'Ügyfél egyenleg és túlfizet...'. The main text on the page reads: 'Az adott megrendeléshez köthető összes tranzakciót az Orders → Transactions táblázatba rögzítjük. Túlfizetés esetén rögzíthetjük egy tételként, vagy szétbonthatjuk két tételre, ha a...'

- [Viv] Bugfix: some reports were generated improperly, for example "PACKING_LIST_ORDER"; fixed:

File name: Framed Eyecare & Glasses - 2022-08-25 - PL.docx
Save as type: Word 2007-2010 Documents (.docx) (*.docx)

- [LLL] Fixed issue where read-only date fields disregarded an attached "FormatString" attribute and showed a time component always:

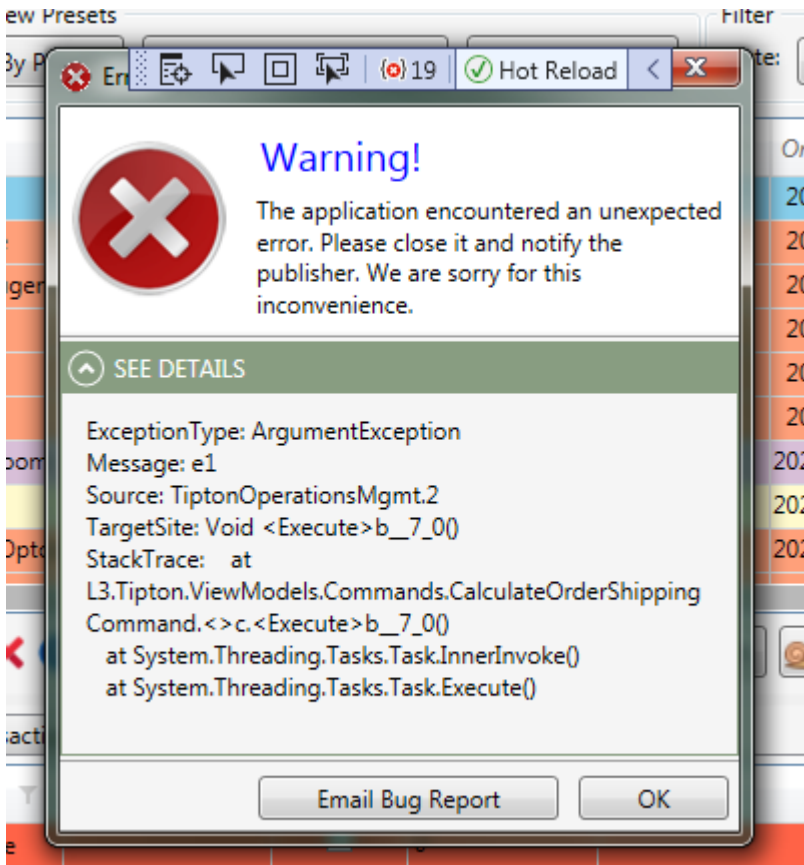

Order Date	2022-05-19
Last Shipment Date	
Quoted Delivery Date	
Delivery Deadline	2022-07-08
Est. Prod. End Date	2022-11-09

- [LLL] Added little question mark to column headers where a description is available:

QA Passed On	Quality	Assembly Site	Stock Checked

Date when the frame passed QA into «In Stock» or «Assigned to Order»

- [LLL] Improved handling of aggregate exceptions:

Revision #7
